| ASSESSMENT OF THE ACTIVITY - <i>continuation</i> | |
|---|---|
| Assessment board | National Examination committee European Expert committee Seminar leader (Expert*in for Historical painting techniques) |
| Assessment basis | Practical exams |
| Assessment criteria's | <p>In the practical part of the exam:</p> <ol style="list-style-type: none"> One to two master's exam parts are prepared: <ul style="list-style-type: none"> a colour study/sketch of the entire building with aesthetically colour enhanced elements of the facade or interior is made, must also be decorated with stucco, sims or statues project is made on paper (also in colour) materials and technology are suggested. Four work tests where candidate must perform the following tasks: <ul style="list-style-type: none"> furniture processing - wood imitation anti-fire coating special protective coatings finishing layers on the facade. <p>Work tests are conducted under the supervision of the master's examination board in a specific examination room (workshop). After successfully completing the work tests, the candidate submits to the examination board all the documentation (construction and technological documentation with calculation) and the production schedule (time and place of production) for the preparation and production of the master product. It is also necessary to defend the completed master's exam work and work tests orally. The preparation of the master's exam takes from 80 to 200 hours, the performance of work tests takes a maximum of 8 hours.</p> <p>The master's thesis or product and the work test with an oral defense are evaluated. The overall assessment of the practical part of the master's exam is based on the following criteria: master's thesis 60% and work tests 40%.</p> <p>The level of professionalism in the approach to work, the quality of the completed individual work phases and the quality of the product as a whole are taken into account. The assessment also takes into account the organization of the workplace, compliance with occupational health and safety regulations, rational and correct use of machines and tools, rationality in the selection of materials and general organization (independence, ingenuity, rationality, ...). The candidate must demonstrate knowledge of modern computer technology and classical technology.</p> |
