DESCRIPTION OF THE ACTIVITY		
Ident number of the activity / UNIT	L4_U11-1	
Goals / field of competence	Extension of the service using the possibilities of digitalization. It uses a master painter's communication to connect a customer (with individual needs) and a manufacturer (who produces the customized wallpaper) and then uses the expertise of the specialist staff to carry out the finishing. The goal is for the painting company to be familiar with the technology so that it can expand its own service. It is not that the painter makes the custom wallpaper, but that he finishes it and knows the technique.	
Training tasks	Description of detailed goals / content (fine goals). Learning outcomes according to PSA qualification portfolio: More and more customers want a unique design. What if the painter told the customer that he can realize any image (family photo, landscape, etc.) in any size in a room? If this is achieved, there will be an expansion of the services of painting professionals, which will promote adaptability in the labor market involving digital technologies. It is not the task of the professional to create digital wallpaper! After the client's needs are determined, a professional is assigned to create the wallpaper in the desired size. However, the application of the wallpaper is the task of the painter, which requires new skills.
